NOTICE

TO: OUR SHAREHOLDERS AND CUSTOMERS

On account of the COVID-19 VIRUS restrictions your Board of Directors feels that for your safety and for the safety of our employees it would be prudent to suspend all Board of Director and public meetings of your Water Company until further notice.

We also cancelled our Annual Shareholders meeting in May. We did receive 76 proxies by mail. The proxies were counted by volunteer numerators and are available for inspection by any shareholder at the Water Company office during normal business hours.

However, we would like to inform you of the following actions and projects that have taken place in the past four months.

Our two water storage tanks have been repainted. We have to repaint these tanks every ten years.

Our PLC and SCADA water control systems that control our pumping plant have been replaced with new updated software.

The major news is your Water Company has been granted a 1.6 million dollar grant to replace all of our old water meters and install state of the art electronic water meters that can be read remotely at any time.

We have issued an RFP for replacement of the roof on our office building and pumping station. This project should be completed prior to the next rainy season.

We continue to increase our Reserve Funds as required by the State of California.

Your Board of Directors are being informed regularly by management of the progress of all approved projects and any problems that may occur in our water plant and systems.

If you have any questions or concerns, please contact the Water Company office.

Respectfully,

BOARD OF DIRECTORS
